## ABOUT US

The ENTECO company was founded in 1999. Our company operates in field of machine tools supply, offering lathes, boring-mills, machining centers and grinders.

We are representative of renowned Italian manufacturers on the Polish market.

The main industries of our work are aerospace, military, energy, tooling industries and special machines dedicated to the customer's needs.

ENTECO is the partner of Rosa Ermando SpA and Favretto Srl since 2021, offering sales and after-sales support to the Polish customers.

## KEY STRENGTHS

- Consulting for customers in the scope of machines selection for the individual production needs.
- Project management and local support from order placement to machine installation at customer premises
- Acceptance and commissioning of the machines with manufacturers
- Training for the customer's personnel in the scope of operation, maintenance and programming with Polish-Italian speaking Enteco's representatives
- After-sales support, Maintenance services provided together with the Rosa's team
- Delivery of equipment and spare parts

## NOTABLE PROJECTS / EXPERIENCE

- Numerous completed projects supplying machine tools for customers' high-precision production lines.
- Local projects completion related to highly-production surface grinders dedicated for the metal processing and press brake tooling equipment. Extensive experience in grinding technology due to various project implementation.
- Technical and commercial support in the scope of machines and equipment selection with customers.
- Supporting customers in realizing governmental investment projects.
