## ABOUT US

MATER was founded in 1995, consolidating the exclusive representation and distribution of leading global brands of CNC and high-tech equipment for moulds, precision metalworking, dies and cuttings, plastic injection, rapid prototyping and more.

Our perseverance, competence and professionalism earned us recognition as trusted partners of top companies, where advanced technology demands high specialization in selection, implementation, production and after-sales. We have installed over 2700 CNC machines to date.

Today we are a 30-person team driven by passion and a single mission: to leverage our technical expertise and experience to guide you in purchasing equipment, ensuring its smooth implementation and delivering maximum productivity, performance and efficiency—while providing continuous and differentiated after-sales support.

## KEY STRENGTHS

- **QUALITY** - We strive for excellence—in our advice, in supporting your installation, and in every investment project. Excellence is expected of us, and our goal is always maximum customer satisfaction.
- **INTEGRITY** - We treat entrusted data with strict confidentiality and take pride in always recommending the best solutions for our customers, independent of our relationships with suppliers.
- **CREATIVITY** - We fight to go further than our competitors, that is why we live with the mission of insistently seek suitable and innovative solutions, that will benefit our customers in their implementation.
- **TECHNICAL COMPETENCE** - We constantly stay updated with the latest technologies to ensure top-quality advice and support. Our after-sales service guarantees a fast response within 24 hours for any machine downtime.

## NOTABLE PROJECTS / EXPERIENCE

- Full supply for several factory projects ( ex. DRT MOULDS )
- Our specialized multidisciplinary team delivers complete support, from equipment selection and installation to full production integration. Our after-sales engineers ensure skilled, professional assistance at every stage.
- Participation in local and international trade fairs (EMAF, MOLDPLAS, BI-MU, EMO...)
