Master Abrasives is an independent provider of abrasives, tools, machinery and equipment and offers professional advice for an extensive range of applications for over 55 years. Our Master® brand of abrasives has been developed to a high standard at a cost-effective level to provide improved productivity and solutions for industry. In 2017 we added capital equipment to our product portfolio and started to offer cylindrical and centerless grinding machines into UK and Europe. We have carefully selected partners to enable us to offer our customers first-class machinery and equipment. We have been a partner of Rosa Ermando SpA and Favretto Srl since 2023, with a growing network of active clients.

KEY STRENGTHS

- Proactive approach to understanding the market and our customers
- Listen and understand customers needs and satisfy them
- Very strong knowledge of applications and processes
- We can support both from a machine perspective and the grinding process
- Well-established and active sales network

NOTABLE PROJECTS / EXPERIENCE

- New supply of a machine to a UK tooling company for very hard materials
- Technical and commercial support for existing customers
- Participation in local and international trade fairs MACH, Grinding Hub, EMO
